

Annual Disposal

Do you know the full cost?

The New Incomatic® – a cost effective, convenient and hygienic means of disposing of incontinence pad waste.

Let us advise you on ways to reduce your Care Home's incontinence pad waste costs

“A large proportion of the clinical waste produced consists of incontinence pads. Installation of macerators for incontinence pads may be considered if the cost benefit is justified.”

(Waste policy, Mersey NHS Trust)

Let us advise you.

Getting rid of the mountains of pads and nappies generated each day in a care home or hospital can be quite a headache. For this all too common problem, the new Incomatic provides a convenient and hygienic remedy that in many cases, will save you money!

It couldn't be simpler! Incontinence products are shredded into fine particles and then discharged into the sewage system. No storage! No smells! No Mess!

At DDC, we have years' of experience of designing maceration systems and with the Incomatic we have produced a macerator that is simply better than ever. Special attention has been given to designing a machine that is robust and able to cope with the high workloads experienced in care homes and hospitals. You will discover a machine that is supremely easy to use, quick and efficient (disposing of up to 4 pads in less than two minutes) and surprisingly quiet.

High Quality Engineering

Design Features

- **Hands free lid opening**
For extra convenience and hygiene and infection control
- **Special antimicrobial compound built into lid**
For added protection and infection control
- **Advanced cutting technology**
For better cutting efficiency and longer cutting life
- **State of the art electronics**
Electronic pulsing allowing you to clear overload situations
- **Automatic disinfection cycle**
Cleansing the chamber and eliminating odours
- **Comprehensive after-sales package**
Once your Incomatic has been installed, our own Service Engineers will call to commission the machine prior to use. As this equipment may be new to some of your staff, we'll make sure operational procedures are fully understood.

Hands-free Opening
